

AI Career OS - Prompt Pack Roadmap

Execution Order

1. Master System Prompt
2. Phase 1 – Premium UI & Frontend
3. Phase 2 – Backend, Database & Authentication
4. Phase 3 – AI Agents & Scheduler
5. Phase 4 – Resume Engine, ATS & Cover Letter
6. Phase 5 – Job Automation, Analytics & Production Deployment

Project Vision

Build a Docker-first AI Career Operating System using Next.js, React, TypeScript, FastAPI, PostgreSQL, Redis, ChromaDB, Ollama, Playwright and APScheduler. The platform will include AI job discovery, ATS analysis, resume optimization, cover letter generation, interview preparation, analytics and user-approved automation.

Important

The complete prompt pack is too large to fit into a single ChatGPT response. It will be divided into multiple phases (Master + Phase 1–5), each designed to be copied directly into Antigravity in sequence.
